

TESTIMONIALS

Fedor Umnov, Project Manager, Zolotoy Shar Group:

This year at our company stand we do not only present packaging equipment manufactured by our exclusive supplier SMIPack, but also the equipment made by our German partner Hugo Back for counting cups and their further packaging. At the moment there is a rising trend towards demand in the plastics segment. During the trade fair we have acquired several customers for this equipment, there is a provisional arrangement already, which may be called a favourable result for us. SMIPack has presented a new model that has no air requirement, which is important for many of our clients. This equipment has been demonstrated several times at this fair, which aroused much interest among visitors. One can see that this year there are more visitors compared with last year. It is worth noting the fair organisers' promotion work paбoty and good advertising of the event. Next year we will definitely participate.
